Watershed Coordinator **Position Description and Vacancy Announcement**

CWICNY Organizational Structure and Mission

The Champlain Watershed Improvement Coalition of New York (CWICNY) is a watershed organization comprised of representatives from the five Soil and Water Conservation Districts, County Water Quality Committees, and the Lake Champlain Lake George Regional Planning Board. The group has many advisory organizations including the NYS DEC, the NYS Soil and Water Conservation Committee, the Lake Champlain Basin Program and others. CWICNY's member organizations work together to implement water quality and other conservation projects, and meets once per month as a group to discuss projects, priorities, and direction.

Job Description

Full time Watershed Coordinator position. This is a civil serviced position for the New York portion of the Lake Champlain Watershed to provide technical and administrative support in locally led watershed planning efforts. This position includes: coordination with local water quality committees, identifying and developing proposals for potential funding sources to address non-point sources of water pollution, soliciting project support from landowners, coordinating with partner agencies and local officials, implementing watershed improvement projects, fulfilling the goals and objectives identified in Total Maximum Daily Loads (TMDLs) and watershed plan documents, providing technical assistance to local watershed committees and conservation districts, development of watershed plan documents, and water quality project monitoring activities. Works with and under the direction of the Champlain Watershed Improvement Coalition of New York President and Board of Directors.

Residency is waived.

Watershed Coordinator - General Statement of Duties

Coordinate, develop, administer and help implement the water quality improvement and natural resources conservation programs under the direction of the CWICNY President and Board of Directors. Duties of this position include but are not limited to the following:

- Establish communication with each county SWCD, municipalities, small watershed/lake organizations, etc. Including but not limited to establishing relationships, determining priorities and identifying projects.
- Manage day to day business of CWICNY including organizing regular meetings, federal vendor registries and by-laws.
- Write grant funding proposals for water quality improvement and natural resources protection projects and programs to State, Federal, and private funding organizations to implement Best Management Practices and goals identified in TMDLs and watershed plans.
- Organize and administer all CWICNY grants and contracts, including but not limited to developing plans of work, financial administration, record matching funds from project

- cooperators and partner agencies, report writing, quarterly reporting, closeouts and ensure projects are meeting deadlines.
- Complete timely tracking and reporting of implementation activities to meet state and federal requirements.
 - Assist with the development and planning of numerous natural resource protection and improvement projects at any given time, including agriculture, stormwater, stream corridor, lake management, wetlands improvement, fisheries habitat, and other similar projects.
 - Organize and develop the annual North Country Stormwater Tradeshow and Conference.
 - Develop and implement CWICNY's Annual Plan of Work.
 - Assist in the coordination of CWICNY activities and projects with all involved agencies.
 - Develop and organize public outreach and educational water quality programs throughout the watershed.
 - Develop educational materials for local watershed committees, conservation districts and the public.
 - Write and develop a quarterly newsletter and annual report and send out to all parties on the mailing list.
 - Represent CWICNY at agency, organization, and municipal functions as appropriate, including oral presentations as required.
 - Other duties as assigned by the CWICNY President and Board of Directors

Required Knowledge, Skills and Abilities

Thorough knowledge of the principles and practices of natural resource conservation with emphasis on water quality issues; strong writing skills including grant proposals and project reports; good knowledge of public or not-for-profit administration; ability to work well with the public and to present conservation programs to interested parties; computer skills including word processing, spreadsheets, databases, and similar programs (GIS mapping a plus); ability to work independently and in groups; dependable; enthusiastic; knowledge of Lake Champlain region a plus.

Qualifications

- A) Graduation from an accredited college or university with a Master's Degree in Natural Resources Management, Agriculture, Hydrology, Environmental Science, Civil Engineering or related field, and at least two (2) years related work experience; or
- B) Graduation from an accredited college or university with a Bachelor's Degree in Natural Resources Management, Agriculture, Hydrology, Environmental Science, Civil Engineering or related fields, plus three (3) years related work experience; or
- C) Graduation from an accredited college or university with an Associate's Degree in Natural Resources Management, Agriculture, Hydrology, Environmental Science, Civil Engineering or related fields, plus five (5) years related work experience.
